

Agencies We Work With

Educational Psychology

Referral to the Educational Psychology Service (EP) is undertaken through planning sessions with the SENDCo and Educational Psychologist. This would then be discussed at a review meeting with parents when we will discuss this with you and ask you for consent. We currently work with Futures in Mind to provide support for our pupils.

Specialist Teacher Assessment Service

Referral to the Specialist Teaching Service would be discussed during the termly review process with the class teacher, parent and SENDCo. A referral form would then be given to the parent to obtain additional information and consent. Specialist Teachers will assess pupils and provide information to support pupils with, for example, dyslexia, learning difficulties, memory deficits, dyscalculia and language development.

Counselling Services/Play Therapy

This is provided for pupils who need additional support to understand their emotions/ deal with loss. Pupils will be identified through discussions with school staff, the inclusion team, parents and if necessary social workers.

Speech and Language Therapy

Pupils can be referred via the Speech and Language Therapist referral forms. Concerns can be raised during review meetings, via the class teacher or directly with the SENDCo.

Paediatrician

We work closely with the Community Paediatricians to support pupils and their families. The SENDCo can refer to the paediatrician if there are significant concerns regarding meeting a pupil's needs in school. Parents can request for a member of staff to attend meetings with them if they feel it would be beneficial.

Physiotherapy and Occupational Therapy

Teaching Assistants will work closely with physiotherapy and occupational therapy to ensure that pupil's programmes are carried out in school. Referral to these services generally comes via the family GP or Community Paediatricians.

Sensory Education Support Team

This service provides advice in order to support pupils with a sensory impairment, for e.g vision or hearing impairment. Referral can be done through school or another agency such as ophthalmology or audiology.

The Working Together Team

Provide strategies/support for children who find the classroom environment a challenge and also staff training. Referral to the team is done through identification at review meetings with the team's Primary lead for Boston – Anthony Bowen.

The BOSS Team

The BOSS team are commissioned as part of the Pupil Re-integration Team at Lincolnshire County Council. They provide support for pupils who are at risk of exclusion due to challenging behaviour. Referral is made through the Pastoral Support Plan (PSP) process.
